

WELCOME TO BEST-HALL

When arriving at the factory, contact reception (+358 6 832 5000) or your contact person directly. The guest parking spaces are indicated by separate markings and can be found in the car park next to the main door.

ACCESSING AND MOVING ABOUT WITHIN THE FACTORY AREA

You can only access the factory area accompanied by a contact person or with their permission. The recommended routes are marked on the map. Driving in the factory area is only permitted for maintenance purposes, and only with the contact person's permission. Please remember that the speed limit is 10 km/h and that several forklifts operate in the area. Do not park your vehicle on pathways or in front of stored materials.

SMOKING

Smoking in the factory area is only permitted in designated areas.

PHOTOGRAPHS

Taking photos and videos is prohibited without permission from your host.

USE OF TELEPHONES

The use of telephones is restricted when moving about in the factory area. Stop and move to a safe place to talk. Do not move during calls.

PROTECTIVE EQUIPMENT AT THE FACTORY

You can either use your own protective equipment during the factory tour or equipment provided by your host. The minimum equipment required for a tour is a reflective vest, safety goggles and long trousers.

In the engineering workshop halls, it is recommended to use ear protectors as well, in case of sudden loud noises.

When working, you must use safety shoes and other protection appropriate for your work.

THINGS TO NOTE AT THE FACTORY

Watch out for forklift traffic! Some forklifts are omnidirectional – i.e. they can move in any direction. They are used to move long poles and elements, which means that the driver might not see the danger zone clearly.

There are also several automated doors in the area. Move away from a doorway immediately as it opens. It is likely that a forklift is coming out. Heavy pipes and elements are stored in the yard area and engineering workshop. Be careful when moving about in these areas. A risk of falling is present, even with supports.

CHEMICAL HAZARDS

The only significant chemical hazard in the area is the liquefied petroleum gas tank between the engineering workshop and the painting department.

Lighting a fire in the safety area is prohibited. If you smell liquefied petroleum gas, immediately notify your host or the painting department directly.

SAFETY OBSERVATIONS

All people moving about in the Best-Hall factory area are asked to immediately notify their contact person of injuries, dangerous situations or other safety observations.

IN CASE OF DANGER:

Warn others of the danger

Rescue those in danger

Prevent or restrict the occurrence of further accidents

Call for help (112)

Direct the rescue team to the site of the accident

If necessary, **move to the assembly area**, which is the car park in the front yard.

Thank you for your attention and have a productive visit!
